What is this?

ConvertorApp is an iOS Image to Text & Speech and PDF app developed in Xcode using Swift 5. Users can select a photo and convert it to text and then the users can download text as PDF or users can listen to the text aloud. Listen to your image via Convertor App. We convert Image to Text, Voice, and PDF. The app is written in Swift 5 and uses Xcode 12.x to build it.

Features:

- Smart Image scanner
- Import image from Gallery
- OCR: Get text from the image.
- Text Export: Convert text into a .pdf file and share it.
- Share Export images as text, speech, PDF, print, mail, other applications.
- Clean coding.
- Easy to reskin.
- How much does it cost?
- Nothing!

Yeah, that's right! I offer this service for free!

How does it work?

It's really simple.

- Open your terminal.
- Run pod install.
- Run ImageToText.xcworkspace file.

Files included:

- Main (.swift) Files
- Pictures
- Icons
- Logo
